

Transdev, a pioneer in shared autonomous mobility, will once again be present at CES 2020 in Las Vegas

Issy-les-Moulineaux (France), December 17, 2019 - [Transdev](#) will participate for the third consecutive year at [CES 2020](#), in Las Vegas, from January 7 to 10, 2020 (booth #1021- Tech East - Westgate Hotel). This is an opportunity for the leading operator of shared autonomous mobility services to review its latest technological advancements and the key milestones of this year 2019.

"Autonomous vehicles will impact our mobility and more broadly our daily lives. We have been working for several years on this new transportation mode, which will first be shared and integrated with the existing public transportation networks that we operate today. For us, the CES is an essential event to meet the leading players in this sector, with whom we collaborate to offer our customers everywhere a mobility that is more flexible, cleaner and more accessible", explains Patricia Villoslada, Executive Vice President of Transdev Autonomous Transport Systems.

Worldwide, the Transdev Group has already carried more than 3.5 million passengers as part of its autonomous vehicle transport services. It has extensive feedback on existing shared mobility solutions on the market by collaborating with its various partners including Lohr, EasyMile, TORC Robotics and Renault.

State-of-the-art technologies to build the future of mobility

To develop and integrate the autonomous transport solutions of tomorrow, Transdev Autonomous Transport Systems continues to strengthen its teams, mainly in R&D in the fields of embedded intelligence and supervision. It welcomes experts in security of complex systems, artificial intelligence or user experience, beyond the business skills of public transportation, automotive, robotics, rail, aeronautics, etc.

A collaborative approach to customer experience

With its partners, Transdev wishes to deploy autonomous electric shuttle fleets within its transportation networks in addition to existing services, in terms of geography and time. The Group, with its multi-manufacturer and multi-partner approach, designs the *Autonomous Transport System by Transdev* which integrates autonomous vehicles, a client-passenger application, connected infrastructure and a supervision system. As an international player, Transdev is committed to providing its expertise to its clients, both public and private, in order to support them in the implementation of this new innovative mobility solution.

About Transdev

As an operator and global integrator of mobility, Transdev, The mobility company, allows everyone to move freely. Transdev transports 11 million passengers daily through its various efficient and environmentally friendly modes of transport, which connect individuals and communities. Transdev advises and supports local authorities and companies in the search for safer and innovative mobility solutions in a sustainable collaboration: 82,000 men and women at the service of its customers and passengers. Transdev is 66% owned jointly by Caisse des Dépôts and 34% by the RETHMANN Group. In 2018, with operations in 20 countries, the Group generated sales of €6.9 billion.
